

GAME OVERVIEW

DRAGGO™

JEWELS OF FORTUNE

Game Description (for Players)

Start a fire in Drago – Jewels of Fortune, the 1600 ways to win videoslot. Find the dragon's lair in the Respin Round to take all their riches. In the Free Spins, gather modifiers for a very volatile feature

Game Information (for Operators)

Drago – Jewels of Fortune is a high volatility, high production value videoslot. The main markets for the game are the UK market, along with Western Europe and the Northern European markets. However, because of the very high quality and attractiveness of design, it is likely to have mass market appeal.

Drago uses a combination of atypical reels and a high number of different manual Free Respin features – users will get to play respins with individual dragons, along with manually winning their modifiers for the Free Spins round. It is intended to appeal to the fun player audience which is very likely to find the interactivity and focus on individual characters engaging.

From a business perspective, it is created for the mass market, finding audiences on any type of gaming site, from casino, to Bingo, Lotto and sportsbooks.

The best way to promote Drago is through tournaments using our in-game promotion tool, on rules that are either related to time on machine – number of spins, total wager done – or based on the highest win. FRB can increase its uptake, as the game can attract more players through its appealing design and interactive gameplay.
